Dmytro Pidenko

Front-end/ Markup developer

I develop websites using HTML5, CSS3, Javascript, and the Jquery library. I can use and configure the assembly on Gulp , write CSS code using the Sass preprocessor, work with Git. In the layout, I try to focus on the BEM methodology and the use of flex-box. There are also basic concepts of working with CMS Wordpress, an HTML Pug preprocessor, there are basic concepts of working with React.
